PROFESSIONAL SUMMARY

Dedicated and skilled epidemiology master's student with robust experience in in health systems research, digital health interventions, and non-communicable disease (NCD) control. Proficient in R and SPSS, with a solid foundation in both qualitative and quantitative research methodologies. Through my work with the Health Management department at TU Berlin, I have developed expertise in translating research into evidence-informed health policy. This includes effectively communicating findings to policymakers, healthcare providers, and the public in ways that drive meaningful changes in health practices and policies. Demonstrated ability to lead projects, manage teams, and execute detailed tasks with precision. Fluent in English and French, with international experience in clinical and public health domains. Passionate about strengthening healthcare systems through evidence-based solutions and digital health innovations.

SKILLS

-**Qualitative and Quantitative Research**: Designed and conducted studies on mental health, using tools like SPSS and R for data analysis.

- **Microsoft Office**: Advanced in Word, Excel and PowerPoint, creating detailed reports and presentations.

- **Multilingual Communication:** Fluent in English, French and several languages, facilitating effective communication in diverse settings.

-**Report Writing and Presentation:** Delivered research findings at university presentations, known for clarity and impact.

- **Leadership:** managing teams and ensuring project success.

- **Team Collaboration:** Worked effectively in multidisciplinary teams, leading to successful project completion.

- **Problem-Solving:** Developed solutions for healthcare challenges, improving patient outcomes.

- **Adaptability:** Transitioned from clinical practice to research, demonstrating flexibility and continuous skill development.

- **Continuous Learning:** Engaged in ongoing professional development to stay current in the field.

EXPERIENCE

Student Assistant

Health Care Management Department- Technische Universität Berlin

Sept 2024 – Present

- Assist in research projects focused on evidence-informed health policymaking, digital health interventions, and health systems strengthening.
- Support the development of policy briefs and reports, translating research findings into actionable insights for policymakers and healthcare stakeholders.
- Conduct literature reviews, data analysis, and stakeholder engagement activities to facilitate knowledge translation in public health.
- Collaborate with multidisciplinary teams to bridge the gap between research and real-world health interventions.

Medical Doctor

Private Practice, Mauritius, Mar 2023 - Sep 2023

- Evaluated patients based upon medical histories and in-depth interviews to determine appropriate actions for care
- Educated patients on preventative healthcare measures, such as diet, exercise, and stress management
- Maintained accurate medical records detailing patient histories, diagnoses, treatments, and progress.

Medical Doctor

Ministry of Health and Wellness, Mauritius, Feb 2022 - Feb 2023

- Team Leader National Deployment and Vaccination plan
- Organized schedules and daily assignments for team, leveraging individual knowledge, and strengths to maximize team success
- Identified areas of improvement and implemented necessary changes
- Maintained accurate records of completed tasks and projects

LANGUAGES

- English (C2)
- French (C2)
- Hindi (C1)
- Mandarin(B1)
- Mauritian Creole (Mother Tongue)

PUBLISHED WORK

1. Austria's example on how implementing a regional oncology network can have an impact
2. Strengthening cancer prevention and early detection in Cyprus

.

3. Slovenian National Committee for Cancer Screening streamlines cancer early detection improvements
4. Building a collaborative framework for advancing cancer care in Belgium
5. A dedicated directorate to improve cancer care pathways
6. Advancing breast cancer prevention in Greece: The "Fofi Genimmata" screening program

Link: https://eurohealthobservatory.who.int/monitors/pace/case-studies/

REFEREES:

1. Dr. Florian Tille
Technical Officer
European Observatory on Health Systems and Policies Berlin Hub - Technische Universität Berlin (TUB)
tillef@obs.who.int

2. Nadja Wülk
Academic coordinator
MSc Epidemiology Research Associate, Converge
nadja.wuelk@charite.de

- Conducted quality control checks on vaccine inventory and test materials regularly
- Collaborated with other healthcare professionals to coordinate patient care efficiently.
- Attended training sessions on new immunization recommendations,
- guidelines, and techniques

Medical Intern

Ministry of Health and Wellness, Mauritius, Oct 2019 - May 2021

- Documented patient progress notes, discharge summaries, and referral letters using electronic medical record systems effectively
- Developed strong communication skills by interacting with diverse patient populations across various age groups and cultural backgrounds
- Monitored patients' vital signs regularly during their hospital stay to identify any changes requiring immediate intervention
- Counseled patients on preventive measures for maintaining overall health, managing chronic diseases, or recovering from acute illnesses.

EDUCATION

Master of Science (M.S.): Epidemiology

Charité – Universitätsmedizin Berlin, Oct 2023 - April 2025

- Ongoing Thesis: Adverse events of Digital Therapeutics in Mental Healthcare: A comprehensive systematic review

Master of Science (M.S.): Health Services Management

University of Technology, Mauritius, From Oct 2021 - May 2024

- Graduated Master Degree with Merit
  Thesis: To find the causes of stigma of mental health in the Mauritian Society and how to destigmatize it
- The course combines theoretical foundations with practical applications, covering critical areas such as healthcare policy, strategic planning, health economics, and quality improvement.

Bachelor of Medicine and Bachelor of Surgery

Southern Medical University, People's Republic of China, From Oct 2011 - Jun 2017

- Awarded Best International intern by Panyu Central Hospital
